## POSITION

QA Engineer / Software Tester

## EDUCATION

2021 - 2025

Computer Science - Data  
Science and Cybersecurity

Bangkok University

- GPA: 3.06

## SOFT SKILL

- self-controlled
- Team Player
- Positive Attitude
- Meeting Targets
- Continual Improvement
- Problem-solving
- Analytical Thinking

## HARD SKILLS

### Testing & QA Tools

- Robot Framework
- Postman
- Jira

### Databases & Frameworks

- PostgreSQL
- Firebase

### Programming Languages

- Python
- SQL
- JavaScript
- TypeScript
- HTML & CSS

### Tools & Version Control

- Git/GitHub
- VSCode
- Figma
- Draw.io

## EXPERIENCE

### Full Stack Developer | Siam Software Solution

Jan 2025 – May 2025

- System Testing & Validation: Tested the Rajathand system to ensure data accuracy, identify bugs, and report issues for timely resolution.
- Data Integrity Verification: Wrote complex SQL queries to extract, validate, and debug data, ensuring backend database consistency during the testing phase.
- API Integration & Verification: Developed and integrated APIs for managing key business data, and verified data transfer accuracy between frontend and backend services.

## PROJECTS

### BU Library (Service Reservation Web App) (2025)

- Tools: HTML, TailwindCss, JS, Firebase, Figma
- Developed a web app for reserving library services (e.g., meeting rooms, board games) with a dedicated admin panel.
- Designed the database schema to manage resource availability, user bookings, and track all reservation data.

### TamrapAhan (Mobile Recipe Application) Tools: .NET MAUI, C#, GitHub (2023)

- Developed a cross-platform mobile application (iOS/Android) for recipe management, featuring user-generated content and image uploading.
- QA Focus: Conducted functional testing on core features, including recipe creation, data saving, and file uploads, to ensure system reliability
- UI/UX Testing: Verified cross-platform compatibility and UI responsiveness across different mobile screen sizes for both iOS and Android environments.
